LETTER OF RECOMMENDATION

I am pleased to recommend Mr. Tirth Manishbhai Asodariya, with whom I have had an association since 2022. While he is pursuing his bachelor's degree in Computer Engineering, I taught a Computer Networks course in his fourth semester. His dedication to understanding underlying concepts, rather than merely memorizing information, set him apart from his peers. Furthermore, as his Final Year Project Guide, I observed his creative skills and innovative ideas firsthand.

Tirth possesses a profound understanding of intricate concepts, distinguishing him from his peers. His proactive learning approach and commitment to excellence are evident in the quality of his work. Notably, in his final year project on Traffic Signal Violation Detection, Tirth played a pivotal role in facilitating real-time monitoring and control of traffic signals.

His intelligence is complemented by excellent analytical abilities and critical thinking skills. Tirth's capacity to apply theoretical knowledge to practical scenarios has consistently impressed our team. In addition to his academic achievements, during his internship under my mentorship, Tirth consistently showcased exceptional skills and unwavering dedication.

As his professor, I can assure you that a student like him has the potential to advance well in his endeavors and will be able to bring honor to your highly regarded institution through his accomplishments. I therefore sincerely recommend that he pursue higher education at your institution.

Sincerely,

Prof. Jaydeep Gheewala
Assistant Professor,
Department of Computer Engineering
Sarvajanik College of Engineering and Technology
